InfoHub

What's New — June 2026 Release

New Pages

NEW PAGE **Daily Digest /today**

One-page snapshot of everything moving the market right now: key prices with 24h change, Fear & Greed index, BTC dominance, 24h liquidation totals, highest/lowest funding rates, OI surges & dumps, top movers, and up to 3 algorithmic trade ideas. Auto-refreshes every 5 minutes. Share button copies a Telegram-ready text summary with one tap.

NEW PAGE **DEX Whale Tracker /whales**

Real-time fills above your chosen size threshold ($50K to $1M+) from Hyperliquid (live WebSocket) and dYdX (5-second poll). Filter by 14 coins: BTC, ETH, SOL, ARB, DOGE, AVAX, LINK, SUI, OP, NEAR, APT, WIF, PEPE, TIA. Live buy/sell flow bar updates in real time. No login required.

Upgrades to Existing Pages

UPGRADED **Smart Money /watch**

Suggested wallet count increased from 8 to 12 — pulls the top performers from both Hyperliquid and GMX leaderboards so you have more quality addresses to add with a single click.

UPGRADED **Signals /signals**

Added Telegram community call-to-action. OI surge & dump detection now runs on both 1h and 4h windows, giving earlier and more reliable breakout signals.

UPGRADED **Screener /screener**

Controls row split into two rows for mobile: search + filter toggle on top, quick-preset tabs (scrollable) below. No more wrapping or hidden buttons on narrow screens.

UPGRADED **Home Page**

Added live MarketPulse ticker strip above the fold and a DEX Whales activity card. New community section with Telegram invite.

Navigation & Discovery

UX **Sidebar — new pages wired in**

Daily Digest added to the 'Start Here' group. DEX Whale Tracker added to the 'Smart Money' group. Both show a NEW badge.

UX **What's New popover updated**

Changelog entry for June 21 session lists Daily Digest, DEX Whale Tracker, Smart Money expansion, and Screener mobile fix.

UX **FAQ updated**

Two new entries in the Data & Features section: 'What is the Daily Digest?' and 'What is the DEX Whale Tracker?'

Telegram Alerts

ALERTS **Daily briefing now broadcasts to public channel**

The 08:00 UTC Telegram digest is now sent to the public InfoHub channel in addition to individual subscribers.

ALERTS **Critical funding signal broadcast**

Extreme funding rates (above +0.1% or below -0.05%) now trigger a broadcast message to the public channel, not just private alerts.

ALERTS **Daily Digest share — Copy Text button**

On /today, the share panel now includes a blue 'Copy text' button that puts a fully-formatted Telegram markdown summary on your clipboard, ready to paste into any group.
